Terms and conditions mentioned in Annexure_1 is applicable.

Annexure 1

Brief Technical Specification of PIM/PAM Solutions

#	Requirement Description
1	Proposed solution must support browser-based RDP & SSH without additional server resource requirement. Capability must be supported in multi-site architecture.
2	Proposed solution must support connections from endpoints, HTML5 browser and Microsoft Remote Desktop Service Terminal Server technology. Solution must not rely on OS dependent SSH Tunneling and third-party terminal services technology.
3	Proposed solution must support built-in plugin development kit for integrating specialized clients & utilities on-demand. Additional plugins during the lifetime of solution must be developed as part of support capabilities without additional professional service cost.
4	Proposed solution must support provisioning, de-provisioning & operations of privileged accounts from PAM interface
5	Proposed solution must allow restrictive, controlled & secure sharing & collaboration of privileged session among support teams working across multiple locations without requiring agents
6	Proposed solution must support continuous discovery & auto-onboarding of privileged accounts. Explain how continuous discovery works in the solution.
7	User based licensing
